

## Materials

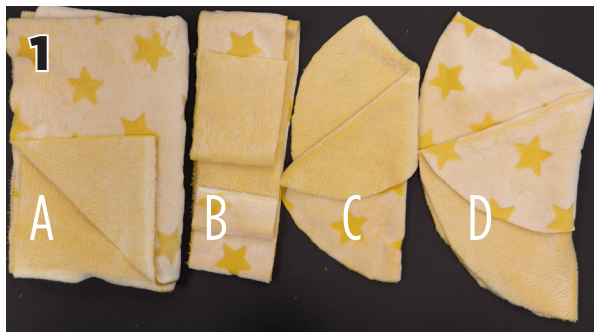

- 1.2m fleece
- 3lbs of polyester fill
- 8" zipper
- thread

## Sewing Info

- Seam allowances are 1/4" unless otherwise indicated.
- Pleat: A fold formed by doubling over the fabric and stitching it to itself and secured in place. Used in garments to fit narrower parts, or in drapes for texture.

## Instructions

- A. Cut 1 Rectangle 5" x 63"  
B. Cut 1 Rectangle 20"x63.5"  
C. Cut 1 Circle with a 15" diameter  
D. Cut 1 Circle with a 20" diameter

2. Fold the 20"x63.5" rectangle with the short ends right sides together. Stitch with a 1/4" seam allowance.

3. Pin your 5"x63" rectangle with the right side to the wrong side of the tube you just created. Match ends of the rectangle to the seam of the tube. Baste in place.

4. To attach your 15" circle to the tube you will need to pleat the tube and rectangle, where you just basted, to fit the circle. Pin in place and stitch.

5. Place the bottom edges of your tube and rectangle right sides together and baste.

6. Stitch one side of the zipper to the tube and rectangle that were just basted.

7. Stitch the other side of the zipper to the 20" circle.

8. Stitch the rest of the 20" circle to the rectangle.

9. Turn the bed right side out through the zipper opening.

10. Stuff your bed. Because of the construction, of the bed, you can stuff the tube and main bed separately.

11. Fluff your bed, close the zipper and watch your pet climb into comfort!
