

Materials

- 1.5m fleece
- Plastic Canvas
- Spaghetti strap turner or home decor needles

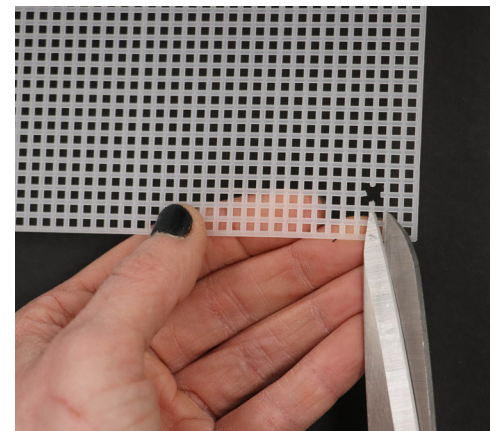

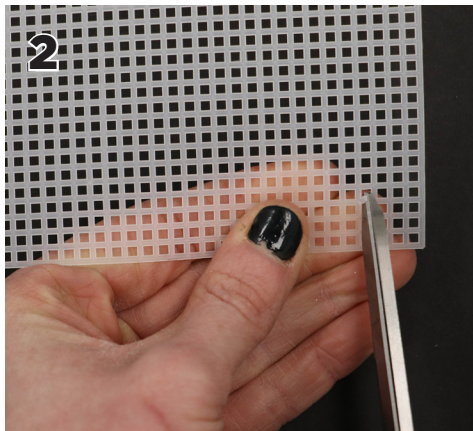

Sewing Info

- Spaghetti Loop Turner: A spaghetti loop turner is used to turn straps the right side out. Slide the turner through the strap, using the hook grab the end of your strap and pull.

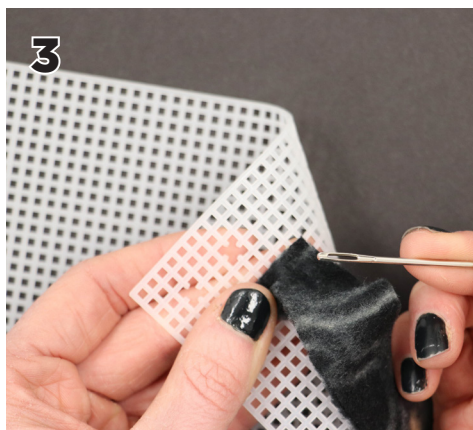

Instructions

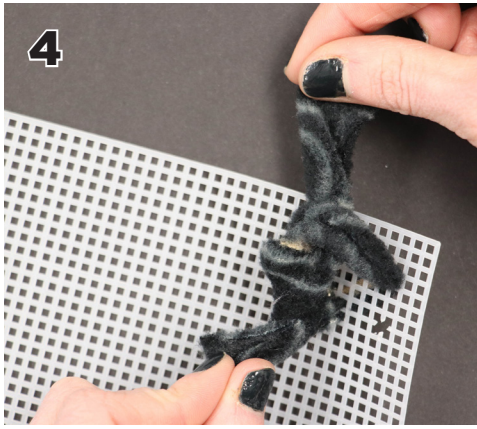

1. Cut your fleece into strips measuring 1"x7".

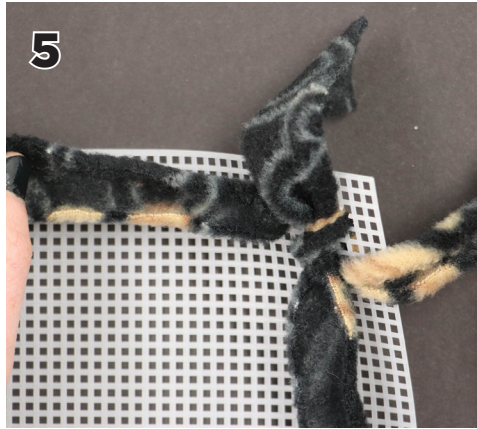

2. Cut larger holes into your canvas so the fleece will fit through. To do this we cut an 'x' through 4 small squares to make 1 large square. Alternate from cutting 1 square to not cutting.

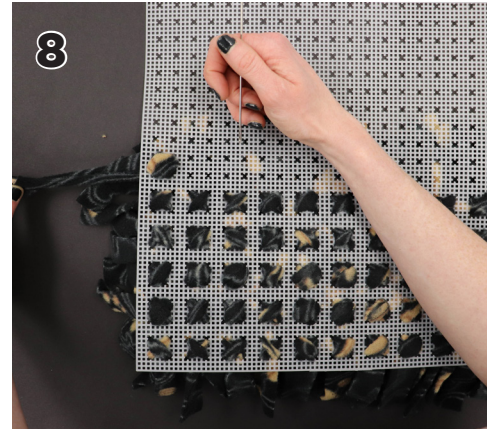

3. Push one end of your fleece strip through a square using a large needle or a spaghetti strap turner.

4. Pull the other end in up through the hole diagonally across from it and tie a knot.

5. Repeat with a new strip through the opposite holes and tie a knot.

6. Repeat through the remaining holes.
