

Sewing Instructions

1. Choose a pattern like Burda 9326 and use it to create a top and bottom. Alternatively, you can use black pajamas. *Do NOT sew the sleeve underarm seam or the shirt side seams.

2. Measure the length of your sleeve and cut 6 rectangles measuring 5" wide by the underarm sleeve length. For example, our sleeve measures 15 1/2" so we cut out 6 rectangles measuring 5" x 15 1/2"

Materials-Dress

- Burda 9326
- Main Fabric: 2m black Jersey
- Lace: 0.5m
- Jersey Ball point needles
- Poly fill 4lb bag
- Invisible thread.

Sewing Info

- Alternatively, a black set of pajamas or a sweatshirt can be used. Instead of sewing the arms and web into the shirt you will simply topstitch the pieces to your sweatshirt.

3. Fold your long edges right sides together and stitch with 1/4" seam allowance along the long edge and one short end. Repeat for all 6 rectangles.

4. Turn right side out and stuff all 6 spider arms, set aside.

5a. Measure down from your underarm seam to the bottom of your top. Disperse three of your legs evenly along the side seam, pin in place. .

5b. Spread out the arms. Measure from the bottom end of the sleeve all the way down to the end of your last arm. Using this measurement (drop length), your sleeve measurement and the length of your top we will cut out the spiders web like so.

6. Evenly space 3 arms and the web between each side seam of your top and stitch the side seam closed securing the arms. We left a 1" gap between each arm.

7. Place the top of the spider web between the underarm and sew to secure. Using invisible thread hand-stitch the arms to the web.
